

Year 6, The Sultan's School Primary Mathematics, Medium Term Plan

Unit 1		
Number & place value	Addition & subtraction	Properties of shapes

Unit 2			
Multiplication & division	Multiplication & division**	Fractions	Position and Direction

Unit 3			
Addition & subtraction	Addition & subtraction**	Decimals	Measurement (length)

Unit 4			
Multiplication & division	Fractions including Decimals and Percentages	Fractions including Decimals and Percentages*	Measurement (time)

Unit 5		
4 Operations including Number and Place Value	4 Operations including Number and Place Value**	Algebra

Unit 6				
4 Operations including Number and Place Value**	Multiplication & division	Multiplication & division including decimals	Multiplication & division including decimals**	Measurement (mass)

Unit 7			
Fractions	Fractions**	Ratio and Proportion	Statistics

Unit 8			
Multiplication & division	Multiplication & division including decimals	Multiplication & division including decimals**	Measurement (perimeter and area)

Unit 9		
4 Operations	4 Operations**	Algebra

Unit 10 (2 Weeks)	
4 Operations	Multiplication & division including Number & place value Measurement (including Temperature)

\*= shortened unit      \*\*= extended unit

<b>Unit 1</b>		
<b>Number – Number and Place Value</b>		
<b>Number – Addition and Subtraction</b>		
<b>Geometry – Properties of Shapes</b>		
<b>National Curriculum Attainment Targets</b>	<b>Lesson Objectives</b>	<b>Lesson</b>
Pupils should be taught to:	Pupils will be taught to:	
Number – Number and place value	<b>Week 1</b>	
<ul style="list-style-type: none"> <li>• read, write, order and compare numbers up to 10 000 000 and determine the value of each digit</li> <li>• round any whole number to a required degree of accuracy</li> <li>• solve number and practical problems that involve all of the above</li> </ul>	• Read and write numbers up to 10 000 000 and determine the value of each digit	1
	• Order and compare numbers up to 10 000 000 and determine the value of each digit	2
	• Round any whole number to a required degree of accuracy	3
	• Solve number problems and reason mathematically	4
Number – Addition and subtraction	<b>Week 2</b>	
<ul style="list-style-type: none"> <li>• perform mental calculations, including with large numbers</li> <li>• solve addition and subtraction multi-step problems in contexts, deciding which operations and methods to use and why</li> <li>• solve problems involving addition, subtraction, multiplication and division</li> <li>• use estimation to check answers to calculations and determine, in the context of a problem, an appropriate degree of accuracy</li> </ul>	• Add mentally, including with large numbers • Use estimation to check answers	1
	• Subtract mentally, including with large numbers • Use estimation to check answers	2
	• Add and subtract decimals mentally	3
	• Solve addition and subtraction multi-step problems in contexts, deciding which operations and methods to use and why • Use estimation to check accuracy of answers	4
Geometry – Properties of shapes	<b>Week 3</b>	
• recognise, describe and build simple 3-D shapes, including	• Recognise, describe and build simple 3-D shapes	1

making nets	• Identify and build different nets for a cube	2
	• Construct nets for a cube and a cuboid	3
	• Construct nets for 3-D shapes with one or more triangular faces	4

Unit 2		
Number – Multiplication and division**		
Number – Fractions		
Geometry – Position and direction		
National Curriculum Attainment Targets	Lesson Objectives	Lesson
Pupils should be taught to:	Pupils will be taught to:	
Number – Multiplication and division	<b>Week 1</b>	
<ul style="list-style-type: none"> <li>practise multiplication for larger numbers, using the formal written methods of short and long multiplication *</li> <li>perform mental calculations, including with large numbers</li> <li>solve problems involving addition, subtraction, multiplication and division</li> <li>use estimation to check answers to calculations</li> </ul>	<ul style="list-style-type: none"> <li>Multiply mentally, including with large numbers</li> <li>Use the formal written method of short multiplication to calculate ThHTO × O</li> <li>Estimate and check the answer to a calculation</li> </ul>	1**
	<ul style="list-style-type: none"> <li>Use the expanded written method to calculate TO × TO</li> <li>Estimate and check the answer to a calculation</li> </ul>	2**
	<ul style="list-style-type: none"> <li>Use the formal written method of long multiplication to calculate TO × TO</li> <li>Estimate and check the answer to a calculation</li> </ul>	3**
	<ul style="list-style-type: none"> <li>Solve problems involving addition, subtraction, multiplication and division</li> </ul>	4**
Number – Fractions	<b>Week 2</b>	

<ul style="list-style-type: none"> <li>• use common factors to simplify fractions; use common multiples to express fractions in the same denomination</li> <li>• compare and order fractions, including fractions <math>&gt; 1</math></li> <li>• add and subtract fractions with different denominators and mixed numbers, using the concept of equivalent fractions</li> </ul>	<ul style="list-style-type: none"> <li>• Use common factors to simplify fractions; use common multiples to express fractions in the same denomination</li> </ul>	1
	<ul style="list-style-type: none"> <li>• Compare and order fractions, including fractions greater than 1</li> </ul>	2
	<ul style="list-style-type: none"> <li>• Add fractions with different denominators and mixed numbers, using the concept of equivalent fractions</li> </ul>	3
	<ul style="list-style-type: none"> <li>• Subtract fractions with different denominators and mixed numbers, using the concept of equivalent fractions</li> </ul>	4
<b>Geometry – Position and direction</b>	<b>Week 3</b>	
<ul style="list-style-type: none"> <li>• describe positions on the full coordinate grid (all four quadrants)</li> <li>• draw and translate simple shapes on the coordinate plane, and reflect them in the axes</li> </ul>	<ul style="list-style-type: none"> <li>• Use coordinates to describe the positions of shapes in all four quadrants</li> </ul>	1
	<ul style="list-style-type: none"> <li>• Plot and label rectangles, squares, parallelograms and rhombuses in the four quadrants; use the properties of shapes to predict missing coordinates</li> </ul>	2
	<ul style="list-style-type: none"> <li>• Use coordinates to translate shapes into all four quadrants; use the properties of shapes to predict missing coordinates</li> </ul>	3
	<ul style="list-style-type: none"> <li>• Use coordinates to reflect shapes in the axes into all four quadrants; use the properties of shapes to predict missing coordinates</li> </ul>	4

<b>Unit 3</b>		
Number – Addition and subtraction**		
Number – Decimals		
Measurement (length)		
National Curriculum Attainment Targets	Lesson Objectives	Lesson
Pupils should be taught to:	Pupils will be taught to:	
Number – Addition and subtraction	<b>Week 1</b>	

<ul style="list-style-type: none"> <li>practise addition and subtraction for larger numbers, using the formal written methods of columnar addition and subtraction *</li> <li>solve addition and subtraction multi-step problems in contexts, deciding which operations and methods to use and why</li> <li>solve problems involving addition, subtraction, multiplication and division</li> <li>use estimation to check answers to calculations and determine, in the context of a problem, an appropriate degree of accuracy</li> </ul>	<ul style="list-style-type: none"> <li>Add whole numbers using the formal written method of columnar addition</li> <li>Estimate and check the answer to a calculation</li> </ul>	1**
	<ul style="list-style-type: none"> <li>Subtract whole numbers using the formal written method columnar subtraction (decomposition)</li> <li>Estimate and check the answer to a calculation</li> </ul>	2**
	<ul style="list-style-type: none"> <li>Add and subtract decimals using the formal written methods of columnar addition and subtraction (decomposition)</li> <li>Estimate and check the answer to a calculation</li> </ul>	3**
	<ul style="list-style-type: none"> <li>Solve problems which require answers to be rounded to specified degrees of accuracy</li> </ul>	4**
<b>Number – Decimals</b>	<b>Week 2</b>	
<ul style="list-style-type: none"> <li>identify the value of each digit in numbers given to three decimal places and multiply and divide numbers by 10, 100 and 1000 giving the answers up to three decimal places</li> <li>multiply decimals by whole numbers, starting with the simplest cases, such as <math>0.4 \times 2 = 0.8</math>, and in practical contexts, such as measures and money *</li> <li>solve problems which require answers to be rounded to specified degrees of accuracy</li> </ul>	<ul style="list-style-type: none"> <li>Identify the value of each digit in a number with three decimal places</li> </ul>	1
	<ul style="list-style-type: none"> <li>Multiply and divide numbers by 10, 100 and 1000 where the answers up to three decimal places</li> </ul>	2
	<ul style="list-style-type: none"> <li>Multiply decimals by whole numbers including in practical contexts</li> </ul>	3
	<ul style="list-style-type: none"> <li>Solve problems which require answers to be rounded to specified degrees of accuracy</li> </ul>	4
<b>Measurement (length)</b>	<b>Week 3</b>	
<ul style="list-style-type: none"> <li>solve problems involving the calculation and conversion of units of measure, using decimal notation up to three decimal places where appropriate</li> <li>use, read, write and convert between standard units, converting measurements of length from a smaller unit of measure to a larger unit, and vice versa, using decimal notation up to three decimal places</li> <li>convert between miles and kilometres</li> </ul>	<ul style="list-style-type: none"> <li>Convert from smaller to larger standard units of length and vice versa; use decimal notation up to three decimal places</li> </ul>	1
	<ul style="list-style-type: none"> <li>Calculate and convert between standard units of length to solve problems; use decimal notation up to three decimal places</li> </ul>	2
	<ul style="list-style-type: none"> <li>Calculate and convert between standard units of length to solve problems; use decimal notation up to three decimal places</li> </ul>	3
	<ul style="list-style-type: none"> <li>Convert between miles and kilometres making approximate conversions and connect conversion to a graphical representation</li> </ul>	4

<b>Unit 4</b>		
<b>Number – Multiplication and division</b>		
<b>Number – Fractions (including decimals and percentages) **</b>		
<b>Measurement (time)</b>		
<b>National Curriculum Attainment Targets</b>	<b>Lesson Objectives</b>	<b>Lesson</b>
Pupils should be taught to:	Pupils will be taught to:	
<b>Number – Multiplication and division</b>	<b>Week 1</b>	
<ul style="list-style-type: none"> <li>practise division for larger numbers, using the formal written method of short division *</li> <li>divide numbers up to 4 digits by a two-digit number using the formal written method of short division where appropriate</li> <li>perform mental calculations, including with large numbers</li> <li>identify common factors, common multiples and prime numbers</li> <li>solve problems involving addition, subtraction, multiplication and division</li> <li>use estimation to check answers to calculations</li> </ul>	<ul style="list-style-type: none"> <li>Identify common factors, common multiples and prime numbers</li> <li>Perform mental calculations, including with large numbers</li> </ul>	1
	<ul style="list-style-type: none"> <li>Use the formal written method of short division to calculate <math>\text{ThHTO} \div \text{O}</math></li> <li>Estimate and check the answer to a calculation</li> </ul>	2
	<ul style="list-style-type: none"> <li>Use the most efficient method to calculate <math>\text{ThHTO} \div \text{TO}</math></li> <li>Use the formal written method of short division to calculate <math>\text{ThHTO} \div \text{TO}</math> where appropriate</li> <li>Estimate and check the answer to a calculation</li> </ul>	3
	<ul style="list-style-type: none"> <li>Solve problems involving addition, subtraction, multiplication and division</li> <li>Estimate and check the answer to a calculation</li> </ul>	4
<b>Number – Fractions (including decimals and percentages)</b>	<b>Week 2</b>	
<ul style="list-style-type: none"> <li>associate a fraction with division and calculate decimal fraction equivalents [for example, <math>0\bullet375</math>] for a simple fraction</li> </ul>	<ul style="list-style-type: none"> <li>Associate a fraction with division and calculate decimal fraction equivalents</li> </ul>	1**
	<ul style="list-style-type: none"> <li>Associate a fraction with division and calculate decimal fraction equivalents</li> </ul>	2**

[for example, $\frac{3}{8}$ ] • recall and use equivalences between simple fractions, decimals and percentages • solve problems involving the calculation of percentages [for example, of measures, and such as 15% of 360] and the use of percentages for comparison [NC Domain: Ratio and proportion]	• Recall and use equivalences between fractions, decimals and percentages	3**
	• Solve problems involving the calculation of percentages and the use of percentages for comparison	4**
Measurement (time)	<b>Week 3</b>	
• use, read, write and convert between standard units, converting measurements of time from a smaller unit of measure to a larger unit, and vice versa	• Convert from smaller to larger standard units of time and vice versa	1
	• Calculate and convert between standard units of time to solve problems	2
	• Calculate speed using compound units, for example, miles per hour	3
	• Apply the calculation of speed using compound units to subjects such as science	4

<b>Unit 5</b>		
<b>Number – Addition, subtraction, multiplication and division, including Number and place value**</b>		
<b>Algebra</b>		
<b>National Curriculum Attainment Targets</b> Pupils should be taught to:	<b>Lesson Objectives</b> Pupils will be taught to:	<b>Lesson</b>
Number – Addition, subtraction, multiplication and division, including Number and place value	<b>Week 1</b>	
• perform mental calculations, including with mixed operations and large numbers • use their knowledge of the order of operations to carry out calculations involving the four operations	• Use negative numbers and calculate intervals across zero	1**
	• Use negative numbers in context, and solve multi-step problems	2**
	• Calculate mentally, including with mixed operations and large numbers	3**

<ul style="list-style-type: none"> <li>practise addition and subtraction for larger numbers, using the formal written methods of columnar addition and subtraction *</li> <li>solve addition and subtraction multi-step problems in contexts, deciding which operations and methods to use and why</li> <li>solve problems involving addition, subtraction, multiplication and division</li> </ul>	<ul style="list-style-type: none"> <li>Use knowledge of the order of operations to carry out calculations involving the four operations</li> </ul>	
	<ul style="list-style-type: none"> <li>Add and subtract mentally and using the formal written methods</li> <li>Solve problems involving addition, subtraction, multiplication and division</li> </ul>	4**
Number – Number and place value		
<ul style="list-style-type: none"> <li>use negative numbers in context, and calculate intervals across zero</li> </ul>		
<b>Algebra</b>		
<b>Week 2</b>		
<ul style="list-style-type: none"> <li>use simple formulae</li> <li>generate and describe linear number sequences</li> <li>express missing number problems algebraically</li> <li>find pairs of numbers that satisfy an equation with two unknowns</li> <li>enumerate possibilities of combinations of two variables</li> </ul>	<ul style="list-style-type: none"> <li>Use simple formulae</li> </ul>	1
	<ul style="list-style-type: none"> <li>Generate and describe linear number sequences</li> <li>Use simple formulae</li> </ul>	2
	<ul style="list-style-type: none"> <li>Express missing number problems algebraically</li> <li>Use simple formulae</li> </ul>	3
	<ul style="list-style-type: none"> <li>Find pairs of numbers that satisfy an equation with two unknowns</li> <li>Enumerate possibilities of combinations of two variables</li> <li>Use simple formulae</li> </ul>	4

**Unit 6**

**Number – Multiplication and division\*\***

**Number – Multiplication and division, including Decimals\*\***

Measurement (mass)		
National Curriculum Attainment Targets	Lesson Objectives	Lesson
Pupils should be taught to:	Pupils will be taught to:	
Number – Multiplication and division	<b>Week 1</b>	
<ul style="list-style-type: none"> <li>practise multiplication for larger numbers, using the formal written method of long multiplication*</li> <li>multiply multi-digit numbers up to 4 digits by a two digit whole number using the formal written method of long multiplication</li> <li>perform mental calculations, including large numbers</li> <li>use estimation to check answers to calculations</li> </ul>	<ul style="list-style-type: none"> <li>Multiply mentally, including large numbers</li> <li>Use partitioning to calculate HTO × TO</li> <li>Estimate and check the answer to a calculation</li> </ul>	1**
	<ul style="list-style-type: none"> <li>Multiply mentally, including large numbers</li> <li>Use partitioning and the grid method to calculate HTO × TO</li> <li>Estimate and check the answer to a calculation</li> </ul>	2**

Number – Addition, subtraction, multiplication and division	<b>Week 1</b>	
<ul style="list-style-type: none"> <li>perform mental calculations, including large numbers</li> <li>practise addition and subtraction for larger numbers, using the formal written methods of columnar addition and subtraction *</li> <li>use knowledge of the order of operations to carry out calculations involving the four operations</li> <li>solve problems involving addition, subtraction, multiplication and division</li> <li>use estimation to check answers to calculations and determine, in the context of a problem, an appropriate degree of accuracy</li> </ul>	<ul style="list-style-type: none"> <li>Perform mental calculations, including large numbers</li> </ul>	1**
	<ul style="list-style-type: none"> <li>Add and subtract whole numbers using the formal written methods of columnar addition and subtraction</li> <li>Estimate and check the answer to a calculation</li> </ul>	2**
	<ul style="list-style-type: none"> <li>Use knowledge of the order of operations to carry out calculations involving the four operations</li> </ul>	3**
	<ul style="list-style-type: none"> <li>Solve problems involving addition, subtraction, multiplication and division</li> </ul>	4**
Algebra	<b>Week 2</b>	
<ul style="list-style-type: none"> <li>use simple formulae</li> <li>generate and describe linear number sequences</li> <li>express missing number problems algebraically</li> </ul>	<ul style="list-style-type: none"> <li>Use simple formulae</li> <li>Generate and describe linear number sequences</li> </ul>	1
	<ul style="list-style-type: none"> <li>Express missing number problems algebraically</li> <li>Use simple formulae</li> </ul>	2

<ul style="list-style-type: none"> <li>• find pairs of numbers that satisfy an equation with two unknowns</li> <li>• enumerate possibilities of combinations of two variables</li> </ul>	<ul style="list-style-type: none"> <li>• Find pairs of numbers that satisfy an equation with two unknowns</li> </ul>	3
	<ul style="list-style-type: none"> <li>• Represent simple equations as a line graph</li> <li>• Enumerate possibilities of combinations of two variables</li> <li>• Use simple formulae</li> </ul>	4

<b>Unit 10</b>		
<b>Number – Multiplication and division, including Decimals**</b>		
<b>Number – Fractions</b>		
<b>National Curriculum Attainment Targets</b> Pupils should be taught to:	<b>Lesson Objectives</b> Pupils will be taught to:	<b>Lesson</b>
Number – Multiplication and division	<b>Week 1</b>	

<ul style="list-style-type: none"> <li>multiply multi-digit numbers up to 4 digits by a two-digit whole number using the formal written method of long multiplication</li> <li>solve problems involving addition, subtraction, multiplication and division</li> <li>use estimation to check answers to calculations and determine, in the context of a problem, an appropriate degree of accuracy</li> </ul>	<ul style="list-style-type: none"> <li>Use mental methods to divide numbers with up to two decimal places by digit whole numbers, e.g. <math>6.4 \div 8</math>, <math>32.4 \div 4</math>, <math>6.39 \div 3</math></li> <li>Divide numbers with up to two decimal places by one-digit whole numbers using the formal written method of short division</li> <li>Divide numbers with up to two decimal places by one-digit whole numbers using the formal written method for short division by converting decimals to whole numbers before calculating and then converting the answer back to decimals</li> </ul>	<p>1**</p> <p>2**</p>
<p>Number – Decimals</p>	<ul style="list-style-type: none"> <li>Estimate and check the answer to a calculation</li> </ul>	
<ul style="list-style-type: none"> <li>multiply one-digit numbers with up to two decimal places by whole numbers</li> <li>multiply numbers with up to two decimal places by two-digit whole numbers *</li> </ul>	<ul style="list-style-type: none"> <li>Compare and order numbers from 0 up to 50; use &lt; and &gt; signs</li> </ul>	<p>2**</p>
	<ul style="list-style-type: none"> <li>Read and write numbers to 50 in words</li> </ul>	<p>3**</p>
	<ul style="list-style-type: none"> <li>Multiply one-digit numbers with up to two decimal places by two-digit whole numbers, e.g. <math>7.56 \times 34</math>, using the formal written method by converting decimals to whole numbers before calculating, then convert the answer back to decimals</li> <li>Estimate and check the answer to a calculation</li> </ul>	<p>4**</p>
<p>Number – Fractions</p>	<p><b>Week 2</b></p>	
<ul style="list-style-type: none"> <li>use common factors to simplify fractions; use common multiples to express fractions in the same denomination</li> <li>add and subtract fractions with different denominators and mixed numbers, using the concept of equivalent fractions</li> <li>multiply simple pairs of proper fractions, writing the answer in its simplest form [for example, <math>\frac{1}{4} \times \frac{1}{2} = \frac{1}{8}</math>]</li> <li>divide proper fractions by whole numbers [for example, <math>\frac{1}{3} \div 2 = \frac{1}{6}</math>]</li> </ul>	<ul style="list-style-type: none"> <li>Use common factors to simplify fractions</li> <li>Use common multiples to express fractions in the same denomination</li> </ul>	<p>1</p>
	<ul style="list-style-type: none"> <li>Add and subtract fractions with different denominators and mixed numbers, using the concept of equivalent fractions</li> </ul>	<p>2</p>
	<ul style="list-style-type: none"> <li>Multiply simple pairs of proper fractions, writing the answer in its simplest form</li> </ul>	<p>3</p>
	<ul style="list-style-type: none"> <li>Divide proper fractions by whole numbers</li> </ul>	<p>4</p>
